

Notice: Why We Don't Offer Stain Codes for Cabinets

Here at RTA Cabinet Store we prioritize transparency and quality in all our products. We understand the importance of touching up cabinets and accessories items with a perfectly matched stain for your cabinets, but unfortunately, we do not offer stain codes for our cabinets.

Why? It's simple. Stains can vary significantly due to a multitude of factors, including wood type, application method, and environmental conditions. As a result, offering a specific stain code poses a high risk of the color not matching precisely as expected.

Manufacturers do not distribute stain codes to customers because they cannot guarantee an exact replication of the color. We believe in providing accurate information to our valued customers, and offering stain codes would only lead to potential disappointment and frustration.

Thank you for understanding our commitment to quality and accuracy.

Sincerely,
Team RTA

What we do offer:

- Touch Up Kits for minor damage
- Select Quick Ship lines offer spray paint bottles for touch ups.

Color Match:

A door stain can be matched by national or local paint shops, by bringing them a cabinet door & doing a "color match" as we understand the need to do additional trim, molding, and detail work in a formula that is as close to our door color(s) as possible.

Note: Per our claims policy modifications to the cabinets voids the claims policy.

- *This warranty does not cover damage resulting from accidents during assembly, misuse, dirt, water, tampering, un-reasonable use, improper installation, servicing performed or attempted by unauthorized service agencies or units that have been modified or used for commercial purposes.*
